

Software-Hardware List

1. Install Java
2. The code base is on GitHub (<https://github.com/kumarsumit1/learning>), Only Eclipse is required to run all the code that exists in the GitHub branch. However, all the steps to launch and try the code in Eclipse is mentioned in chapter 4 too.
3. If you want to setup Spark on your local machine then you can follow instructions mentioned in Chapter 3. Also, note that to run Github code Spark installation is not required and Maven library is sufficient.

NOTE: It will work on Linux/Mac(Not on windows) systems
